| BA in Mathematical Economics, Temple University | 2012                     |

## FIELDS

---

Health Economics, Labor Economics, Public Economics

## RESEARCH

---

### *Job Market Paper:*

“Understanding changes over time in the receipt of workers’ compensation benefits”

Workers’ compensation, the oldest social insurance program in the United States, continues to serve as an important safety net for the vast majority of the workforce. The program supports workers at a particularly vulnerable time: immediately after suffering an occupational injury or illness. Yet, despite this vital role, less is known about the program’s long-term trends. To understand these trends, I systematically investigate the reasons for the 43.6 percent decrease in the reciprocity rate of cash benefits over the period from 2003 through 2018. I find that most of this decrease—29.5 percentage points—is explained by improvements to workplace safety within industry sectors.
