

Marc Fulmer, PhD

East Lansing, MI | 517-355-7583 | fulmerm1@msu.edu | marcfulmer.com

PROFESSIONAL SUMMARY

Economist with 9 years of applied experience in market analysis, regulatory auditing, and forensic data work. Specialized in administrative data, survey microdata, causal inference, and trend decomposition. Extensive experience building reproducible workflows in R, Stata, and SAS/SQL, and independently managing end-to-end analytical projects.

TECHNICAL AND ANALYTICAL SKILLS

- **Languages & Tools:** R, Stata, SAS/SQL, Python, Excel, Tableau
- **Methodologies:** Causal Inference, Descriptive Analytics, Difference-in-Differences, Synthetic Control, Trend Decomposition, Data Visualization
- **Applied Focus:** Administrative & Survey Data, Complex Data Harmonization, Replication & Validation, Regulatory Compliance (FERC), Stakeholder Report Writing

PROFESSIONAL EXPERIENCE

Monitoring Analytics, LLC | Eagleville, PA

Market Analyst – Energy Market Monitoring | 2012 – 2015

- **Regulatory Compliance & Auditing:** Audited Black Start revenue requirements for PJM Interconnection, ensuring strict regulatory compliance with Federal Energy Regulatory Commission (FERC) documentation and evidentiary standards.
- **Market Structure Analysis:** Produced detailed economic analyses of ancillary service market structure and performance using SAS and SQL for formal regulatory reporting to PJM stakeholders.
- **Forensic Analysis:** Verified the proper implementation of market clearing rules for joint California-Québec cap-and-invest allowance auctions.

Luminous Financial Planning LLC | Lansdale, PA

Financial Planner (Independent/Self-Employed) | 2016 – 2019

- **Business Management:** Founded and operated an independent financial planning practice, managing end-to-end business operations.
- **Advisory:** Architected comprehensive financial models using MoneyGuidePro (Envestnet MoneyGuide), integrating tax, insurance, and portfolio variables to execute long-term financial strategies.

- **Client-Facing Technology:** Deployed interactive planning environments to facilitate real-time scenario analysis for complex decisions (e.g., Social Security claiming strategies) while maintaining 100% fiduciary compliance as a Chartered Financial Consultant.

RESEARCH AND ACADEMIC EXPERIENCE

Michigan State University | East Lansing, MI

Economist / Researcher (PhD Candidate) | 2020 – Present

- **Trend Decomposition Analysis:** Designed and implemented a decomposition framework using data from the Current Population Survey and Survey of Occupational Injuries and Illnesses to quantify the drivers of a 44% decrease in workers' compensation benefit reciprocity.
- **Factor Attribution:** Quantified the relative contributions of policy changes versus workplace safety improvements, demonstrating that safety gains—not policy retrenchment—account for most of the caseload reduction.
- **Data Strategy:** Engineered parallel Stata and R workflows to harmonize CPS ASEC microdata and SOII injury statistics, aligning disparate reporting systems into a unified analytical framework.
- **Impact Evaluation:** Designed and estimated Difference-in-Differences models to evaluate the causal impact of Oregon labor reforms on benefit reciprocity, ruling out cost-shifting as a driver of observed fiscal outcomes.

Instructor & Technical Communicator | 2021 – 2025

- **Technical Communication:** Managed all aspects of an introductory macroeconomics course for 90 students, translating abstract economic models into clear, real-world applications.

EDUCATION

Michigan State University | East Lansing, MI

PhD in Economics (2026)

Awards: University Distinguished Fellowship, Dissertation Completion Fellowship

Fields: Labor Economics, Public Economics, Health Economics

Temple University | Philadelphia, PA

BA in Mathematical Economics (2012)

Awards: Summa Cum Laude, Phi Beta Kappa
